

# PRIMO PUMPKINS

Fabric by Marcus Fabrics  
Project by Miriam Rawson

*PRIMO PLAIDS by Marcus are for much more than the coziest quilts & PJs! Here, we've used them in harvest colors for some great soft-sculpture decorative pumpkins, designed by Miriam Rawson. The array of colors and patterns makes it easy to create a grouping like this one. Embellish with green primo plaid "leaves" and real tree branches for an eye-catching display full of color and texture.*

**Fabric Requirements:**

1/3 yard fabric for each large-size pumpkin  
 Fat quarters, or scraps for smaller pumpkins  
 Fiberfill  
 Twigs for stems  
 Craft glue

**Instructions:**

(Template provided on Page 3 for various sizes)

1. Cut six of each pumpkin pattern and stitch two pieces, right sides together, with a ¼" seam allowance, leaving a 2" opening for turning. Note: Begin and end stitching ¼" from the pointed ends for easier assembly.
2. With the remaining four pieces, sew them together, two at a time, then stitch all three sets together.
3. Turn right side out and insert stuffing until firm.
4. Hand stitch opening closed, then make a hole in one end of pumpkin for 'stem'. Dip the end of the stick into the glue and insert into the pumpkin. Let it dry. 5. Make several pumpkins for your harvest table or entry.

**NOTE:** We update our PRIMO PLAID colors and designs regularly — please visit your local quilt shop for the latest offerings!

For each Pumpkin, cut six (6) pieces of one size
